## COCO BASKETS LINERS & HANGERS

Coconut coir basket hangers are made of natural coconut fibre. Plants grow faster and flourish in coir baskets with optimum air circulation. These baskets are eco-friendly and last for a long period of time.

## COCO CONICALS & HANGERS

Fancy cone shaped coco liners fixed in an attractive metal holder to make your home and living area pleasant and beautiful, filled with greenery and colour. Eco-friendly, retains moisture for a longer duration.

# COCO COIR POTS

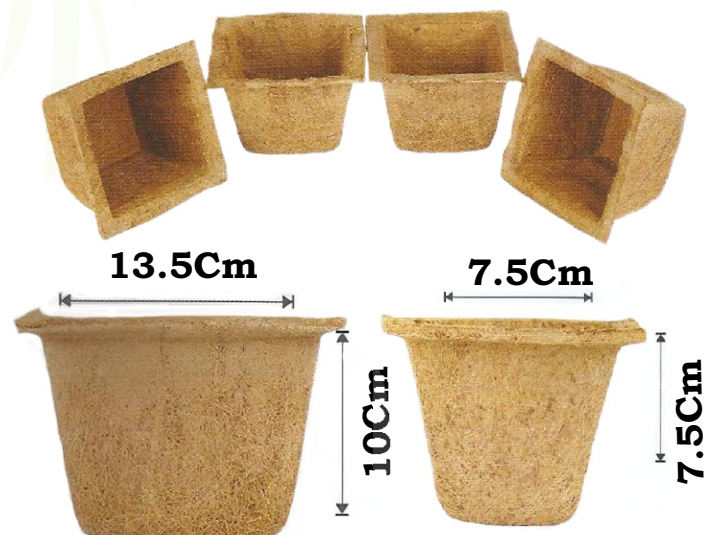

Perfect for planting directly into the soil or larger pots. Minimal root disturbance promotes stronger, healthier plants. Peat free - Made from biodegradable coconut fibre. Best potting container for root aeration.

## TROUGH LINERS

Made from natural coco fibres for strength and water absorbency, these liners are designed to fit trough style planters and hanging baskets.

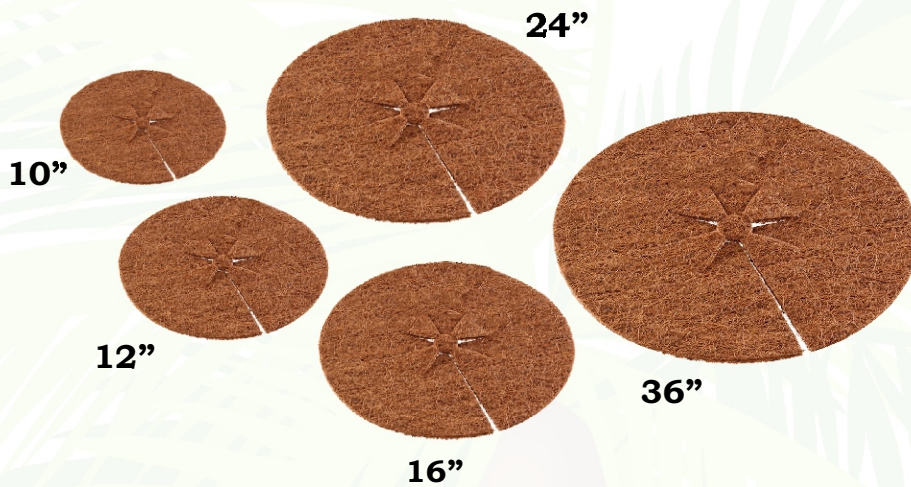

## COCO SPANISH POTS

Coco spanish pot and cups are square in shape which looks elegant growing smaller plants like cactus and succulents plants etc.,

# COCO MULCH MAT

**Coir Mulch Mats are completely biodegradable and ideal for use around plants, shrubs and small trees on ground as well as pots. Mulch Mats help to prevent the growth of weeds and helps deter slugs. Retains moisture in the soil.**

## RECTANGLE MULCH EDGING

**Lightweight and easy to work with. Permeable to water, air and nutrients. Lasts season after season. Can be used alone, or covered with mulch for a classic look. Ideal for edging flower beds, drives and walkways.**

## COIR ROLL

**This roll of liner is made from long-lasting coir fibre with a latex coating in order to provide an attractive and natural lining for baskets, troughs and manges. The roll allows you to cut to size for a perfect fit in unusual or larger planters, standard shaped planters and on the ground.**

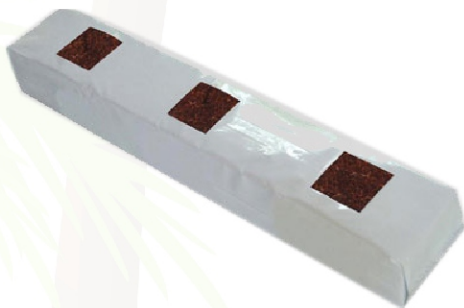

# COCO PLUG PELLETS - Seed propagation media

Fine netting is filled with high-quality coco peat substrate and then compressed to form a handy pellet, ensuring optimum air/water exchange. Use compressed pellets instead of heavy potting soil. On watering, pellet expands to 6cms. Germinated plants can be planted directly in pots or soil with no damage to roots.

## COCO GROW BAGS

Grow bags have become a popular choice for multipurpose growing medium for vegetables, fruits & flowers. Grow bags contains 100% natural coco peat. Grow bags are made up of a special blend of coir pith and chips, designed to provide the ideal air to water ratio for hydroponics. Ready to use bags make it ideal for harvesting and replanting.

## COCO POLES - Plant support

Coco poles are made of coconut coir fibre sheets. It is ideal for creepers, ornamental plants & vegetables. It is one of the best organic growing media support. Coco poles acts as a support stick and promotes plant growth. Tendrils of the plants latch on to the fibre media keeping it moist.
